

Implementing the California Safe Cosmetics Act

Michael J. DiBartolomeis, PhD, DABT, Chief
California Safe Cosmetics Program

*Framing a Research Agenda ...
Healthy Nail Salon Collaborative
April 27, 2009*

Examples of Toxic Chemicals in Some Cosmetics

- Known or likely carcinogen
 - ✓ Arylamines, anilines, azo dyes (hair colors)
 - ✓ 1,4-Dioxane (various products)
 - ✓ Estradiol (shampoos, lotions)
 - ✓ Formaldehyde (nail products, shampoos, body washes)
 - ✓ Methylene Chloride (artificial nails)
 - ✓ Silica (talcum powder and other products)
- Known or likely reproductive toxicants
 - ✓ Lead (some color pigments; lipstick or tattoos)
 - ✓ Phthalates (various products)
 - ✓ Parabens (various products)
 - ✓ Toluene (nail polish)

Public Concerns

- Current Federal and State laws do not require safety testing, review, or approval of cosmetic products prior to marketing
- Products that contain known/suspected carcinogens or reproductive toxicants have not been fully evaluated for long-term health effects
- Product labels not required to include all ingredients such as fragrances, colors & flavors

Public Concerns

- Government & consumers lack information on use of cosmetic products with potentially hazardous chemicals
- Health effects could occur before regulatory action is taken
- Most highly exposed population is workers in the personal care industry

California Safe Cosmetics Act

- Authored by Senator Migden (SB 484)
- Signed into law in October 2005
- Based on “Right-to-Know”
- Precautionary approach; not risk-based
- Chemical substitution
- Division of Environmental and Occupational Disease Control lead for implementation (created CSCP)
- No funding provision

Key Provisions of Safe Cosmetics Act

- Cosmetic manufacturers are required to report to CDPH all products that contain potentially carcinogenic or reproductive toxic ingredients as identified by “authoritative bodies”
- Companies are required to report if:
 - ✓ they marketed product with reportable chemicals in California after January 1, 2007
 - ✓ their name is listed on product label, AND
 - ✓ their total aggregate annual sales exceed \$1 million

Key Provisions of Safe Cosmetics Act

- “Trade secret” information claims
- CDPH to conduct health studies
- Notify Cal/EPA and Cal/OSHA of consumer product or workplace concerns

Initial Focus of CSCP

- Engage stakeholders
- Obtain legal consultation
- Provide guidance
- Outreach
 - ✓ CSCP web page
 - ✓ toll-free help line
 - ✓ information “fact” sheets
 - ✓ contacts database
 - ✓ Contacted 16,000 manufacturers around the world

California Safe Cosmetics Program

The primary purpose of the California Safe Cosmetics Program is to collect information on hazardous and potentially hazardous ingredients in cosmetic products sold in California and to make it available to the public.

Background

Many different chemicals are used in making cosmetics. Consumer and worker advocacy groups are concerned that some cosmetic products contain chemicals known or suspected to cause cancer, birth defects, or damage to the reproductive system. The risk that cosmetics may pose to users is generally unknown because of limited information on exposure or lack of studies on potential health effects. Barbers and hair stylists, nail salon workers, and others who work in cosmetics, skin and body care may be at increased risk for adverse health effects from using these products because they handle greater quantities of them, and with greater frequency. The [California Safe Cosmetics Act \(PDF\)](#) was signed into law in 2005. For all cosmetic products sold in California, the Act requires the manufacturer, packer, and/or distributor named on the product label to provide to the California Safe Cosmetics Program in the California Department of Public Health (CDPH) a list of all cosmetic products that contain any ingredients known or suspected to cause cancer, birth defects, or other reproductive harm.

Program Activities

- Maintain a list of chemical agents known or suspected to cause cancer, birth defects, or other reproductive harm;
- Develop a user-friendly reporting system;
- Create and maintain a database of product ingredient information submitted by companies;
- Create reports of the data that are submitted, including products and ingredients reported, and reformulated products;
- Convene meetings of health advocates, industry, regulators, and others to promote collaborative efforts to ensure product safety.

BỘ Y TẾ TIỂU BANG CALIFORNIA
PHÂN BỘ SỨC KHỎE NGHỀ NGHIỆP
CHƯƠNG TRÌNH MỸ PHẨM AN TOÀN TIỂU BANG CALIFORNIA
 Ngày 29 Tháng 1 Năm 2008

**Những hóa chất được biết hoặc bị nghi ngờ gây ra
 bệnh ung thư, hoặc những bệnh nhiễm độc cơ quan sinh dục khác**

Đạo luật Mỹ Phẩm An Toàn năm 2005 yêu cầu những nhà sản xuất phải thông báo đến Bộ Y Tế Tiểu Bang California tất cả những sản phẩm có chứa những hóa chất được biết hoặc bị nghi ngờ gây ra bệnh ung thư, bào thai khuyết tật hoặc những bệnh nhiễm độc cơ quan sinh dục khác. Để giúp đỡ các công ty trong việc báo cáo nói trên, Bộ Y Tế đã soạn thảo danh sách các hóa chất này với sự tư vấn của Cơ Quan Lượng Định Những Rủi Ro Về Ảnh Hưởng Môi Trường Đối với Sức Khỏe (Office of Environmental Health Hazard Assessment) Bộ Y Tế đã sử dụng những danh sách và báo cáo có sẵn từ những hội đồng khoa học có thẩm quyền, được trích dẫn trong bộ điều luật về Sức Khỏe và An toàn, Mục 111791.5 (Xem chi tiết ở trang cuối của danh sách này). Xin lưu ý rằng không phải tất cả hóa chất được liệt kê sẽ được tìm thấy trong các sản phẩm mỹ phẩm.

"Tên INCI" (International Nomenclature of Cosmetic Ingredients – Thuật Ngữ Quốc Tế cho thành phần Mỹ phẩm) được dùng cho các hóa chất trên được đăng tải trong Tư Điển Quốc Tế về Thành phần Mỹ Phẩm (Ấn Phẩm lần thứ 11.) Số CAS là Số Đăng ký của hóa chất. Không phải tất cả hóa chất liệt kê đều có số Đăng ký CAS hoặc "tên INCI". "Cơ Sở nhận dạng" (Basis for ID) được trích dẫn từ những tổ chức có thẩm quyền đã liệt kê các hóa chất. Trong trường hợp hóa chất được liệt kê bởi Kiến Nghị 65 (Proposition 65) cũng như từ những tổ chức khoa học có thẩm quyền khác, thì chỉ ghi chú là Kiến nghị 65.

Lưu ý cho Người tiêu dùng: Có một số sản phẩm mỹ phẩm không chứa bất kỳ hóa chất nào như được liệt kê. Cũng xin lưu ý rằng khả năng gây ra ung thư hoặc mối nguy hại đến hệ thống sinh dục từ những sản phẩm, còn tùy vào những yếu tố khác như là số lượng và hình thức nhiễm hóa chất từ sản phẩm. Những hóa chất được liệt kê ở đây là kết quả từ những nghiên cứu trên bản thân các hóa chất đó, không phải từ những sản phẩm mỹ phẩm.

	Tên Hóa Chất	Tên INCI	Số CAS	Loại Độc Tính	Cơ sở Nhận dạng
1	A-alpha-C (2-Amino-9H-pyrido[2,3-b]indole)		26148-68-5	ung thư	Proposition 65
2	Acetaldehyde	Acetaldehyde	75-07-0	ung thư	Proposition 65
3	Acetamide		60-35-5	ung thư	Proposition 65
4	Acetazolamide		59-66-5	phát triển	Proposition 65
5	Acetochlor		34256-82-1	ung thư	Proposition 65
6	Acetohydroxamic acid		546-88-3	phát triển	Proposition 65
7	2-Acetylaminofluorene		53-96-3	ung thư	Proposition 65
8	Acifluorfen		62476-59-9	ung thư	Proposition 65
9	Acrylamide		79-06-1	ung thư phát triển	Proposition 65

Initial Focus of CSCP

- Develop and launch online reporting system for cosmetic manufacturers
- Instructions & guidelines
 - ✓ Post online when system launches
 - ✓ Companies required to submit chemical information within four months of system launch
 - ✓ Continuous reporting thereafter - with one month due date
 - ✓ Option to report product reformulations or other changes

Example Data Fields

- Company & submitter information
- Product information
 - ✓ names on label
 - ✓ product type
 - ✓ manufacturer
- Reportable ingredients & concentrations
- Collections, colors, scents, flavors & specific chemicals
- Perjury statement and electronic signature

Product Categories: (check all that apply) **Baby Products**

- Baby Shampoos
- Lotions, Oils, Powders, Creams
- Other Baby Products (Specify):

 Bath Products

- Bath Oils, Tablets, Salts
- Bubble Bath
- Bath Capsules
- Other Bath Product (Specify):

 Fragrances

- Cologne
- Perfumes
- Sachets

 Oral Hygiene Products

- Dentrifices, i.e., aerosol, liquid, pastes, powders
- Mouthwashes and Breath Fresheners, i.e., liquids, sprays
- Other Oral Hygiene Product (Specify):

 Personal Care Products

- Antiperspirants (making a cosmetic claim)
- Bath Soaps and Detergents
- Douches
- Feminine Deodorants
- Lubricants, i.e., personal, sexual, massage oil
- Underarm Deodorants
- Other Personal Care Product (Specify):

 Shaving Products

Initial Focus of CSCP

- Make reported non-confidential information available to the public
 - ✓ Live (coincides with data entry)
 - ✓ Only data not deemed to be trade secret
 - ✓ Subset of all data
 - ✓ Sorted by product type
 - ✓ Captures changes to data
 - ✓ Available for download
 - ✓ Searchable?

Future Activities

- Evaluate reporting compliance and data completeness, including verifying changes in product formulations
- Consider changes in data collection procedures based on evaluation
- Review information collected & assess health implications
- Collaborate with other researchers
